

THE RESMED DIFFERENCE

The proven Mirage dual-wall cushion technology provides an excellent seal without tight headgear, so you don't have to face pressure sores and discomfort.

- The thick inner membrane provides support and stability
- The thin outer membrane increases comfort on contact with the skin
- Together, the two membranes of the dual-wall cushion offer a gentle, yet stable seal

Dual-wall cushion technology combines stability (via the thick inner membrane) and comfort (via the thin outer membrane)
